

End of Life Notification

To: SanDisk Industrial OEM Customers
From: SanDisk Product Marketing
Re: **EOL notification for all Industrial .16 μ products**
Date: August 14, 2003

EOL Number: SDE1236

Products Affected: All Industrial product lines including Industrial Grade, Standard Grade and Utility Grade and all form factors including CompactFlash, PC Card and Flash Drive using Rhodes .16 μ based material

SDCFA-XX-101-00 and SDP3A-XX-101-00 are unaffected by this notification.

Models Affected:

SDCFB(I)-XX-101-YY, SDP3B(I)-XX-101-YY, SD25B(I)-XX-100-YY

- Custom products using .16 μ are affected by this notification as well
- Where XX equals all capacity points and YY equals all suffixes

Effective Date: Effective immediately, all Industrial .16 μ products are EOL. Standard LTB/LTS dates are NOT in effect. LTB/LTS will be supported based upon product availability

Orders and Delivery: SanDisk Corporation will make best efforts to fulfill existing orders for .16 μ material but cannot offer normal LTB/LTS delivery. Material availability is extremely limited and future orders for .16 μ material will be handled on a case-by-case basis.

This accelerated transition is a result of increased demand coupled with industry wide supply shortages.

Sample Availability: SanDisk is accelerating the introduction of .13 μ 1024Mbit technology. Samples will be available beginning September 1, 2003 with full production following late September, 2003

Please contact your SanDisk sales representative for more information or to order samples of the new technology.

Replacement Product(s): Replacement part numbers for these products are as follows:

Old Part Number	New Part Number	New Part Number Sample Date
SDCFJ-64-101-10	SDCFB-64-201-80	Sep 01'03
